

Erythritol 500 grams of powder

Description

Product number B074 - Erythritol 500 grams of powder

Erythritol (1,2,3,4-butanetetrol or C₄H₁₀O₄) is a polyol sweetener naturally found in some mushrooms, fruits (including watermelon, grape and pear) and fermented foods such as wine, cheese, sake and soy sauce. The erythritol in this BioVitaal product is produced by natural fermentation by a renowned French / Swiss company and does not contain any genetically modified ingredients.

Erythritol has up to 70% the sweetening power of regular sugar (sucrose or sucrose), but unlike regular sugar and other polyols such as xylitol and maltitol, it does not provide calories and also has no effect on the beta cells of the pancreas. It is easily absorbed in the small intestine and is therefore often better tolerated than other polyols.

Level scoop ingredients:

Natural sweetener erythritol 2.1 grams

Fillers: none.

Use Powder:

Add to drinks or food according to taste and need. Do not exceed recommended dose and keep out of reach of children. Do not use in hypersensitivity to any of the ingredients in this product. A dietary supplement is not a substitute for a varied diet.
