

MSM-Glucosamine + Complex Vegetarian Formula

Description

Product number B082 MSM-Glucosamine + Complex - 500 gram powder New formula!

Now free from animal ingredients and suitable for vegetarians and vegans.

Complex of the organic sulfur compound MSM, glucosamine sulfate (from microbial fermentation), phytodroitin (from algae), the amino acids L-proline, L-lysine and glycine and the cofactors vitamin C and manganese.

Phytodroitin is the plant-based alternative to / equivalent of chondroitin sulfate that normally comes from sharks or cattle. This renewed formula now no longer contains animal ingredients, such as the glucosamine from the shellfish shell and chondroitin from shark cartilage that were used in the old formula. In order not to further affect the shark stock in the seas, BioVitaal has consciously opted for this for ecological reasons.

Phytodroitin™ is of vegetable origin and is very similar in structure and composition to chondroitin from animal sources. It contains a specific combination of carefully selected mucopolysaccharide-rich algae extracts together with polysaccharides containing glucuronic acid, N-acetylglucosamine and hyaluronic acid; both glucuronic acid and N-acetyl-glucosamine and hyaluronic acid are structural components of glycosaminoglycans and proteoglycans.

The added vitamin C and manganese contribute as cofactors, respectively, to the normal formation of collagen for the normal functioning of the cartilage and normal formation of connective tissue. The amino acids proline, lysine and glycine occur naturally in the collagen in humans.

Ingredients per two level scoops (approximately 10 grams of powder, average daily dose) and% RI:

Glucosamine sulfate 2KCl (from microbial fermentation) 2000 mg

MSM (methylsulfonylmethane) 2000 mg

Phytodroitin (vegetable form of chondroitin, from algae) 890 mg

Vit. C (calcium ascorbate) 360 mg (450% RI)

Manganese (bisglycinate) 5 mg (250% RI)

L-Proline 650 mg

Glycine 650 mg

L-Lysine 500 mg

Filler: maltodextrins (gluten-free, from corn). **Anti-caking agent:** silicon dioxide.

Usage and warnings:

Adults take a level measuring spoon 1 to 3 times a day, dissolve in glass of water or fruit juice. Higher doses according to an expert's prescription. Pregnant women should first consult an expert before using high doses of MSM. Do not exceed recommended dose. Keep out of reach of children. At the dosage we recommend, we have not identified any side effects from this product. Some researchers suspect a negative (increasing) effect on the blood sugar level of glucosamine in laboratory animals, but this has never really been demonstrated in human studies. Glucosamine and chondroitin may enhance the effect of blood-thinning medications. Do not use in hypersensitivity to any of the ingredients in this product. A dietary supplement is not a substitute for a varied diet. Close the packaging immediately after use.
