

OptiPEA®

Description

Product number B093 – 100 VeCaps

OptiPEA® is the patented, GMO-free quality product of the Dutch company Innexus Nutraceuticals. OptiPEA® has an ultra-fine particle size (on average less than 200 µm), which contributes to good absorption.

Palmitoylethanolamide (PEA) is an endogenous, fatty acid-like substance that belongs to the so-called acylethanolamides and can be produced in almost all human cells from phospholipids present in the cell membranes. PEA has physiological functions. Like endocannabinoids, it is an endogenous lipid molecule that is produced 'on demand' by most cells and tissues under certain conditions. PEA contributes to the normal balance/homeostasis in our tissues.

In humans, PEA is present in the brain, nervous system and peripheral organs. Relatively high levels can be found in human milk (breast milk) and in the milk of cattle and elk. In the diet, PEA is present in egg yolk, but also in other foods, such as soybean oil, peanut oil and maize, in the seeds of some types of legumes, such as peas and beans, as well as in some types of vegetables, such as tomatoes and potatoes.

Ingredients per 3 Vegi capsules:

Palmitoylethanolamide 1200mg (OptiPEA®)

Fillers: microcrystalline cellulose. Anti-caking agents: silicon dioxide, vegetable magnesium stearate.

Capsule shell: HPMC (hydroxypropyl methylcellulose).

Usage and Warnings:

Adults initially 1 capsule 3 x daily with a meal. After 6 weeks maintenance dose of 1 to 2 capsules per day, unless otherwise advised by an expert. Do not use during pregnancy. Do not exceed recommended dose. Keep out of reach of children. A dietary supplement is not a substitute for a varied diet.

OptiPEA® is a GMO-free quality product from Innexus Nutraceuticals.
